# ***KNOW YOUR COVERS!***

## **Model Match**

There are a lot of die-cut covers around, past and present—Jewelites, Contours, foreign-made—but this one's so rarely seen, I don't even have a picture of it to run.

*"Model"* was Lion Match Company's trademark for its large die-cut covers; it was produced from 1956-?, but there were very few produced.

There's no listing done on this type of cover.

James Benes reported having five as of October 2001.

*If anyone would send me a scan for future reference, I'd appreciate it.*
