

## 22" Features

Lion Match Company came out with several different versions of its popular Feature matchbook. One of the lesser known types is the 22" Feature, which was introduced c. 1935. These are 40-stick sized covers with 22 sticks.

This certainly isn't an easy category. In fact, it's a really *small* small category. There aren't many different issues around. Joel Acus, who's been collecting them for years, had 97 as of January 2016. There wasn't a listing, so I recently started one, although there's only 16 listed at this point..

Features, of course, are what they are (attractive!) in any size, but this subcategory is so small that it would probably be by and adjunct to most Feature collectors' collections.

Even if you're not a Feature collector, you may still want to keep your eye open for these...if only to say you have some!
