Swedish Foil Boxes

In the world of boxes, these are pretty unique. They measure 3 6/16" x 1 11/16" and are characterized by at least one very attractive embossed, metallic panel. The opposite panel is usually a criss-cross design with no txt except for a "Made in Sweden" manumark. A few are wooden, and some have both panels metallic and embossed.

It should be noted that most collectors, here, include Swedish Foil-like boxes in this category (i.e., Made in Japan, etc.). Mike Prero, CA, maintains the listing; Terry Rowe, OH, had 4,000 of these little gems as of January 2016.
