“Full-Lengths!” “Full-Lengths!” One always hears about Full-Lengths, but references to Vertical Full-Lengths are relatively rare. Shunned, unsavory, perhaps even feared...and why? Does not the design run the full-length of the cover. Are they not Full-Lengths that simply run in a different direction? It’s time we put away our bigotry and prejudice. It’s time for Vertical Full-Lengths to come out of the closet!

They really *are* just as attractive as their horizontal relatives. They come in 20s, 30s, 40s, Giants, boxes, Midgets, and Jewels, although (thanks to the hobby) most seem to be 30-strike Convention Girlies! I can’t recall if I’ve ever seen a 10-strike, but I know I don’t have one.

No one has ever even reported the size of his or her collection...so I’ll have to use my own pitifully small offering...751 as of July 2020.
