

KNOW YOUR COVERS!

Full-Frontals

This is not a trademark this time. 'Full-frontal' is the hobby term collectors apply to a cover with the design continued on the top flap. Thus, this category is not limited to one manufacturer, one size, etc. It's to be found among them all. My collection numbered 622 as of 8/05....and then I gave up on it! *[Oh, we're so fickle!]*

Some of the covers are quite attractive, here, depending on the design and just how much of it actually appears on the top flap, but many others were so *blah!*, just having a few continued lines, bars, etc. on the top flap, that I eventually became disinterested.

....But, I'll bet there are some real Full-frontal enthusiasts out there.
