

Military Wooden Boxes

[Based on a Apr/May 98 Military Matchcover Club article]

If you collect Military, you're well aware that they come in all sizes, from 10s to 40s, Jewels and Jewelites, and boxes...and some of those boxes are wooden, both domestic and foreign-based. The domestic boxes tend to be from the World War II era, while the foreign-based boxes tend to be later... and from US bases overseas.

And, there are more than you might have imagined.

Here's at least a partial list, and I only have a very few of these:
